

Turabi Yıldırım

AI Researcher · Computer Engineer

engineerturph@gmail.com · +90 539 433 01 86 · turabiyldrm.com · LinkedIn · GitHub · Kaggle

Computer Engineering M.Sc. student focused on visual AI, generative video models, and vision-language understanding. Experienced in building PyTorch models from scratch, designing data-augmentation experiments, contributing to Q1-journal publications, and prototyping AI-agent systems.

SKILLS

Languages	Python, C/C++, C#, Java, JavaScript, TypeScript, MySQL
AI / ML	PyTorch, TensorFlow, Hugging Face, Weights & Biases, OpenCV, LangChain, LangGraph, LangSmith, MCP
Software & Tools	Docker, Git, Linux, ReactJS, Spring Boot, MongoDB, Hadoop
Strengths	Strong persistence and creativity

WORK EXPERIENCE

AI Researcher	Feb 2026 – Present
Odine-Supported Research Project · Istanbul	
- Conducting research and development on AI-assisted video generation. - Developing AI-based methods for activity detection.	
Software Engineering Intern	Jul 2025 – Aug 2025
ASELSAN · Ankara	
- Gained hands-on experience with AI-agent architectures, agent-based systems, and MCP. - Built a rapid unit-test generation prototype using LangChain, React, and WebSocket in an enterprise environment.	
Research Student	Jun 2023 – Feb 2025
Yıldız Technical University · TÜBİTAK-Supported Research Group	
- Developed PyTorch models from scratch, designed data-augmentation experiments, and co-authored the manuscript of a study published in IEEE JSTARS (Q1). - Trained LLaVA-OneVision on multiple remote-sensing datasets for a graduation project, producing one of the strongest models in its setting; presented at the SIU 2025 conference.	

PROJECTS

LLaVA-RS — Vision-Language Model for Satellite Imagery	2025
- Built a satellite-image interpretation VLM based on LLaVA-OneVision, integrating Qwen-based LLMs with visual encoders such as SigLIP. - Achieved a literature-leading score on a remote-sensing change-captioning benchmark under contemporary evaluation protocols; released a model on Hugging Face.	
MModalICC — Multispectral Change Captioning	2024
- Co-developed the original model architecture and experimental design over a two-year research effort; analyzed hundreds of experiments across 10+ models. - Trained vision-to-text models on multispectral and RGB satellite imagery; the study was published in IEEE JSTARS (Q1, IF: 6.3).	

EDUCATION

M.Sc. in Computer Engineering	Feb 2026 – Present
Istanbul Technical University · GPA: 4.0 / 4.0	
B.Sc. in Computer Engineering	Sep 2021 – Aug 2025
Yıldız Technical University · GPA: 3.4 / 4.0	
ERASMUS Exchange — Computer Engineering	Jan 2025 – May 2025
University of Oviedo, Spain · Coursework: C#, Java, Spring Boot, Programming Paradigms, Compiler Design	

CERTIFICATES & ACHIEVEMENTS

- Adana Teknofest 2024 — Trendyol E-Commerce Competition, Finalist - Ankara Teknofest 2023 — Deneyap Robotics Competition, Finalist - BAYOYO TED University Artificial Intelligence Summer Camp - ALES: 93.96 · TOEFL: 94 · YÖKDİL: 87.5 - Advanced MySQL Topics — Meta · Machine Learning — Andrew Ng, Stanford · The Complete JavaScript Course — Udemy
